

# Raysun ART-5

## RF wireless A/V Repeater/Transmitter

- Easy operation, small size, light weight, built-in rechargeable battery can work up to 4 hours when full charged. Transmitting range over 800M (sight-line distance).
- Co-work with various frequency bands of receiver to repeat A/V signal for extending transmission distance.
- Can coupling with various camcorder directly as a medium/long distance transmitter.
- Comes with a built-in DVR can record synchronously when repeating or transmitting A/V signal.
- Featuring time display and consecutive number identification to prevent unauthorized editing or modifying.

■ **Application (1) : Repeater**  
Connect a receiver to ART-5 to receive A/V signal of various hidden camera or inspection device from surrounding 50~100M, and then repeat it to around 800~1000M away for remote monitoring/recording synchronously.

**100-150M transmitting distance**

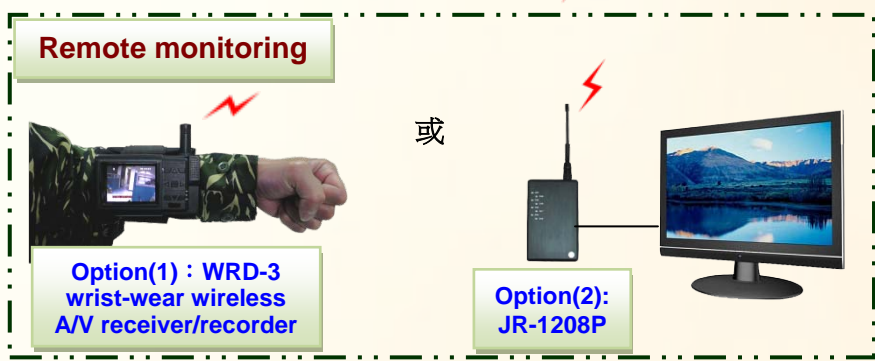

■ **Application (2): Transmitter**  
Connect various camcorders to ART-5 directly for medium/long distance transmission.

**Camcorder connect directly**

**800-1000M repeating/transmitting distance**

**Specifications:**

Model	ART-5
Operation freq.	1.200MHz, 4 sets
Phase-locked	PLL
Freq.-shift	±0.005%
Output power	≥ 4.5W
Output impedance	50Ω
Modulation	FM
Input voltage	AC 100~240V; DC 12V~24V
Current consumption	0.8A/hr
Transmission distance	Downtown/Suburban: around 800M/1000M above
Rechargeable battery	12V/4800mA
Battery running time	4 hrs above
Dimension	Water-proof case: 270×220×95mm
Weight	<2800g
Standard package	ART-5 *1+ JR-1208P *1
