

# RAYSUN 92

## Paintball Pistol

Training ball   Pepper ball   Rubber ball   Fin-stabilized Rubber ball

### Feature:

- The non-lethal 92 simulates the real pistol in shape and shooting mode, it's field proved to be effective for officer training, offense, defense and riot control.
- The 350fps velocity and 0.5" caliber allows to perform as well as 17mm paintball gun with range of 30m, while the cost is much more affordable.
- With two types of end caps: 1. Gas refill type: Allows to refill from gas tank, ideal for training purpose. 2. Rotate type: Use 12g CO2 gas bottle which enables to get armed quickly, suitable for self defense. The quick-release feed system allows to drop the magazine shortly with a touch of button and reload the balls on the fly for continuous firing without missing a beat.
- Support 3 kinds of balls: 1. **Training ball**: Use for shooting practice and the simulation of powder dissemination. 2. **Rubber ball**: Give unbearable pain. 3. **Pepper ball**: Fracture on impact to release irritating pepper powder which can cause severe coughing, tearing, failure to open eyes etc. to incapacitate the target person. The user can give continuous shooting to strike multiple targets simultaneously.
- With modular design and low defective rate; the device comes with manual for users to do proper cleaning and replace the parts by their own.

### Specification:

Caliber	0.5"	Magazine capacity	7 rounds
Velocity	320~350 fps	Shooting mode	Semi auto
Max range	30m	Power	12g Co2 gas bottle
Dimension	192 x 142 x 38(mm) / 535g		
Material:	Plastic (housing), metal (inner parts)		

### Standard package:

Option

#### Standard package:

1. Main unit\*1
2. Magazine\*1
3. Rubber ball\*30
4. Training ball\* 7
5. 12g gas bottle (not include)
6. Rotate end cap\*1
7. Gas refill end cap\*1
8. Carry case\*1

#### Options:

1. Rubber ball.
2. Fin-stabilized rubber ball
3. Training ball
4. Pepper ball
5. Gas refill adapter
